

FALLING ROUND

**FLOWLAC® 100
SPRAYDRYED LACTOSE**

Free fall spraydrying contributes to the outstanding properties of FlowLac 100: very uniform spherical particles and a narrow particle size distribution. FlowLac 100 demonstrates an excellent hardness yield and perfect flowability. Given its fast dissolution in water and its pleasant taste FlowLac 100 is the ideal multipurpose excipient for capsule and sachet filling, effervescent tablets, chewables and for direct tableting.

FlowLac 100 – round about optimal!
